TABLE OF CONTENTS

1 Overview

2 Empathy

3 Prototype

4 Evaluation

5 Reflection

OVERVIEW

BACKGROUND

Despite increasing climate change awareness and a strong desire among university students to make a positive impact, many struggle to take action.

OCBC Climate Index 2022 Finds that Singaporeans have not improved in many sustainable behaviours despite Governmental Push and Heightened Attention

16 Aug 2022

why?

environmental awareness (average score 8.1)
adoption of sustainable behaviors (average score 6.5)

---

difficulty finding time to contribute
believing that their actions are too small to matter

EMPATHY

BREAKDOWNS

1

undervalued contributions

2

too inconvenient

3

lack of encouragement and motivation

REBECCA TAN

YEAR 2 UNIVERSITY STUDENT

ABOUT

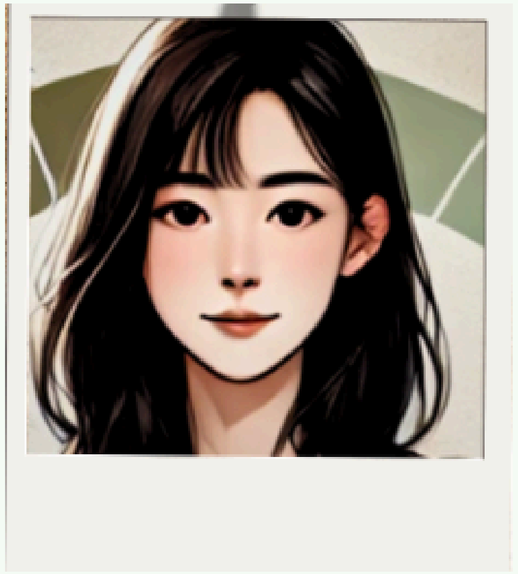

- 21 year old
- Undergraduate student

INTERESTS

- Reading
- Nature walks
- Gardening

PAIN POINTS

- Heavy school commitments
- Feels like my eco-friendly actions have no impact/do not matter
- Difficult to stay motivated without like-minded peers
- Unmotivated to go out of my way to volunteer

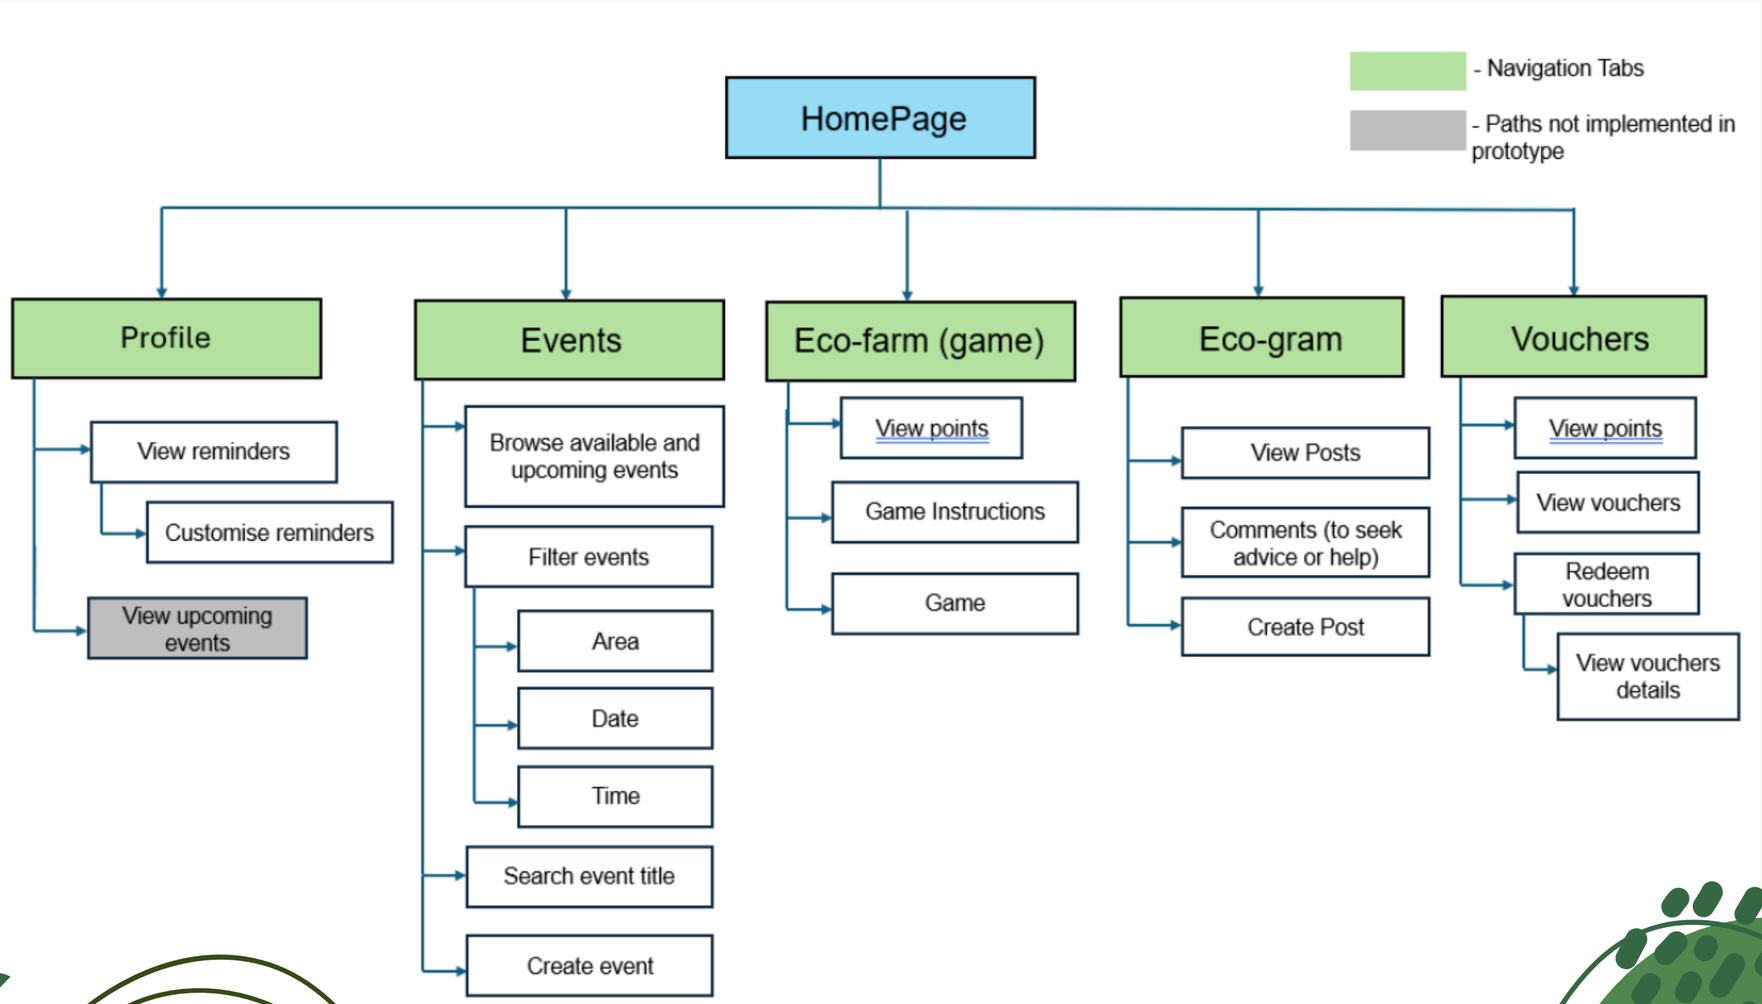

GOALS & NEEDS

- Find ways to contribute to the environment that fits my schedule
- To be motivated and discover simpler, more effective methods to contribute

3

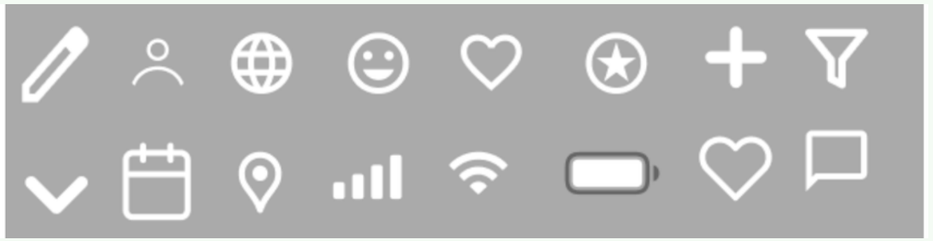

PROTOTYPE

NAVIGATION DIAGRAM

TOOLS

TOOLS: FIGMA

1. Easy to use
2. Allows for real-time collaboration
3. Prior experience

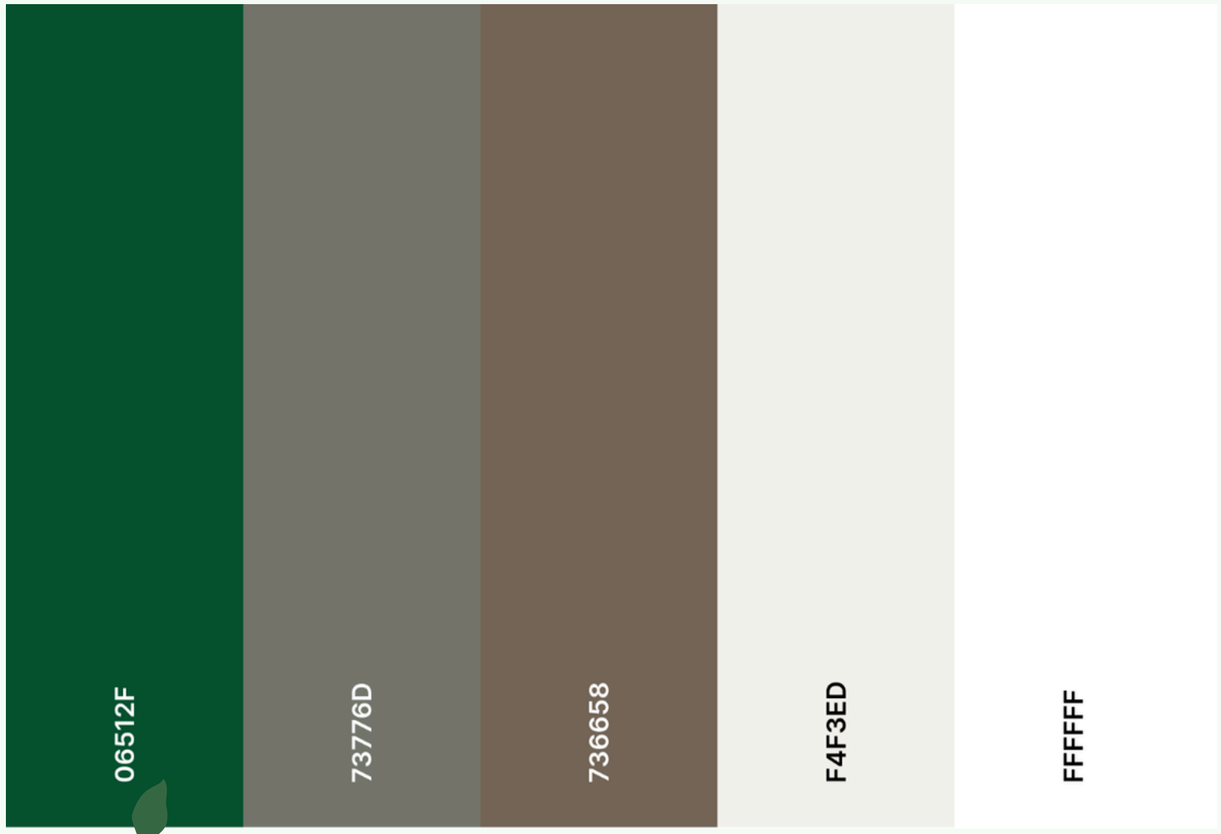

TOOLS: PHONE MODEL

iPhone 16 Plus

- **iPhone has more users in target age group**
- **Newest model**

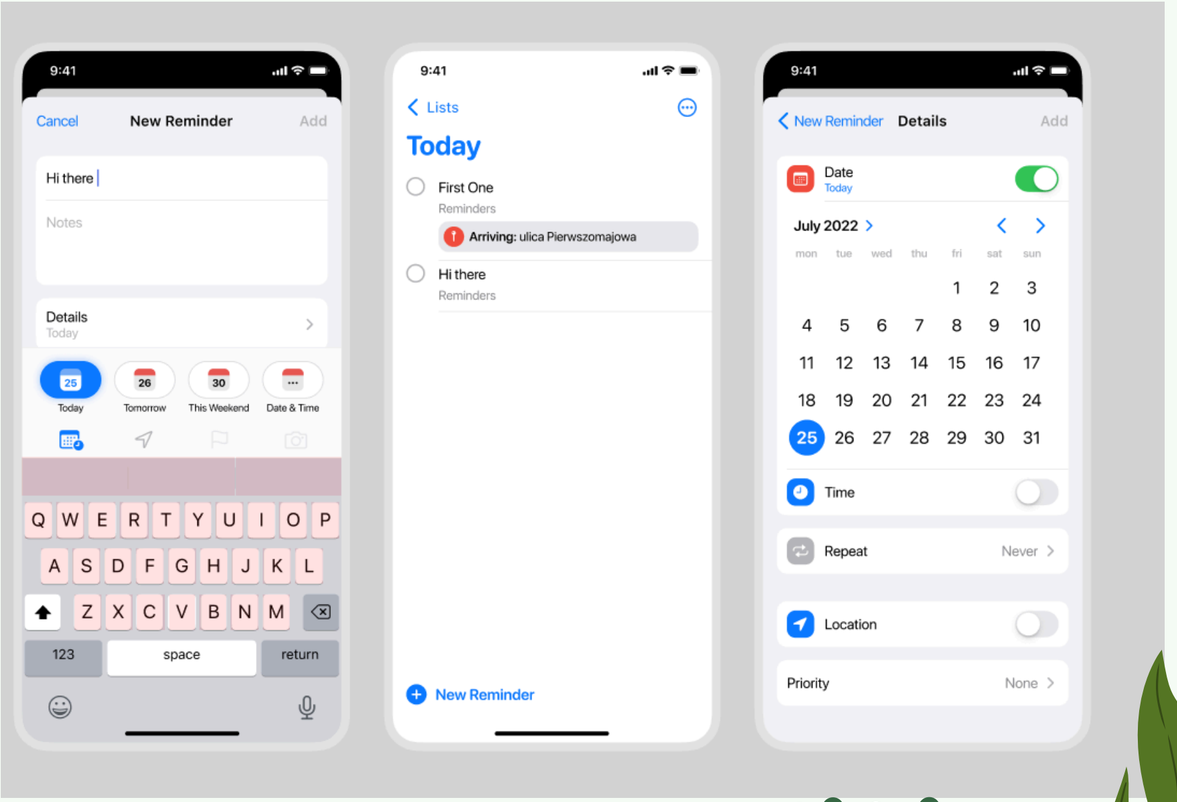

TOOLS: COLOUR SCHEME

1. Green (main) to signify growth, nature
2. Brown (accent) for earthy vibes

APPLE IOS UI TOOLKIT

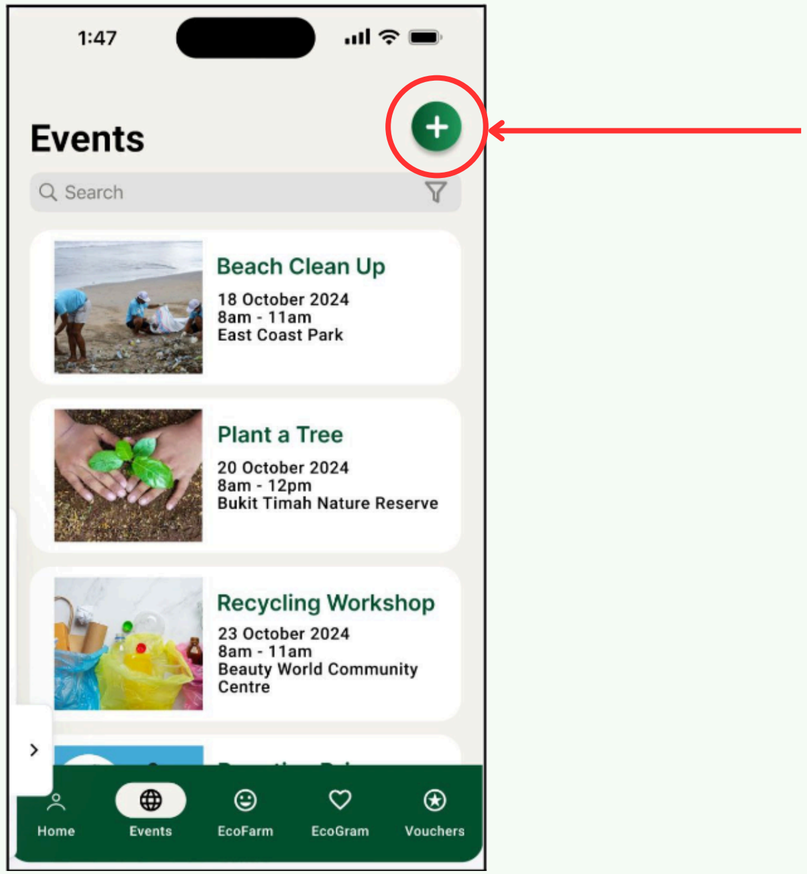

HI-FI SCENARIO

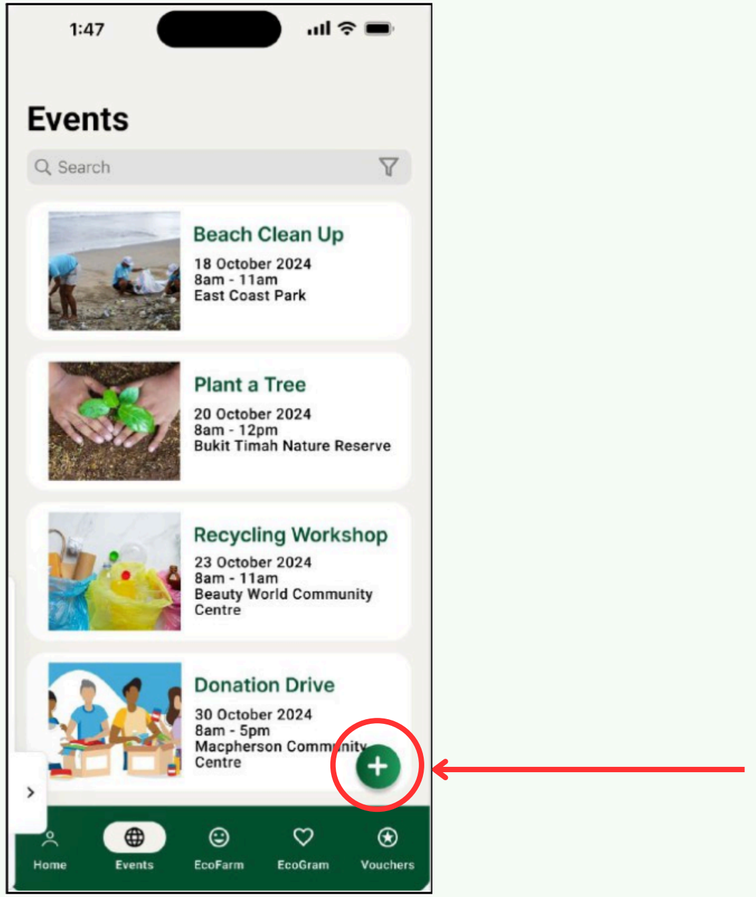

4 EVALUATION

INDEPENDENT VARIABLE

Version A

Version B

WITHIN SUBJECT

+ Reduction of Individual Differences

+ Cost-Effectiveness

+ Enhanced User Feedback

- Order Effects

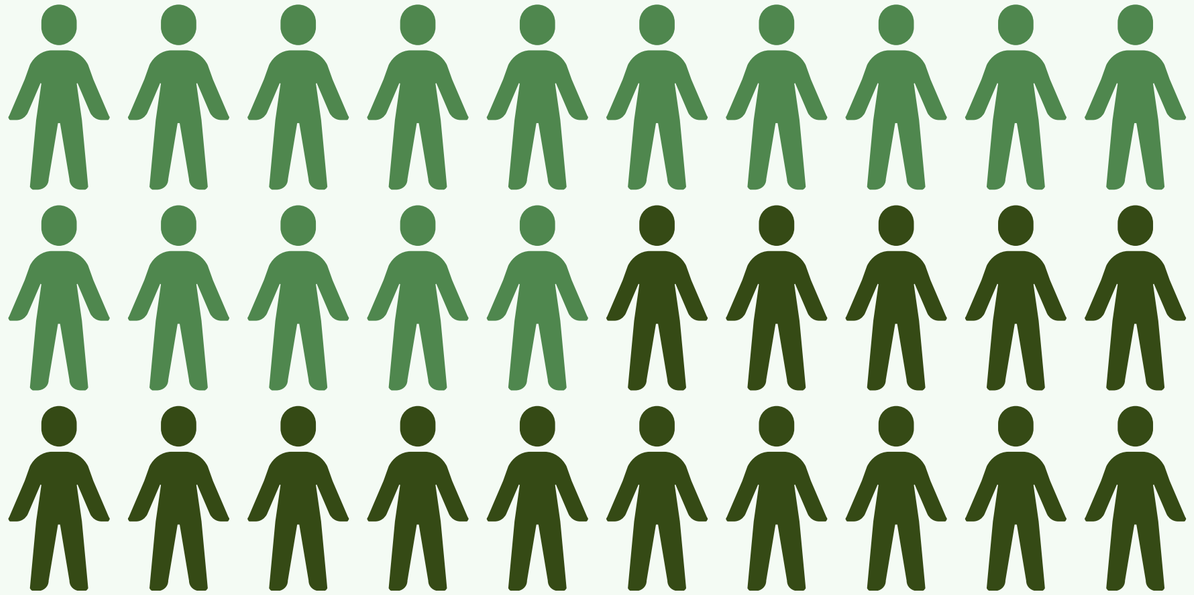

- Fatigue Effects

WITHIN SUBJECT

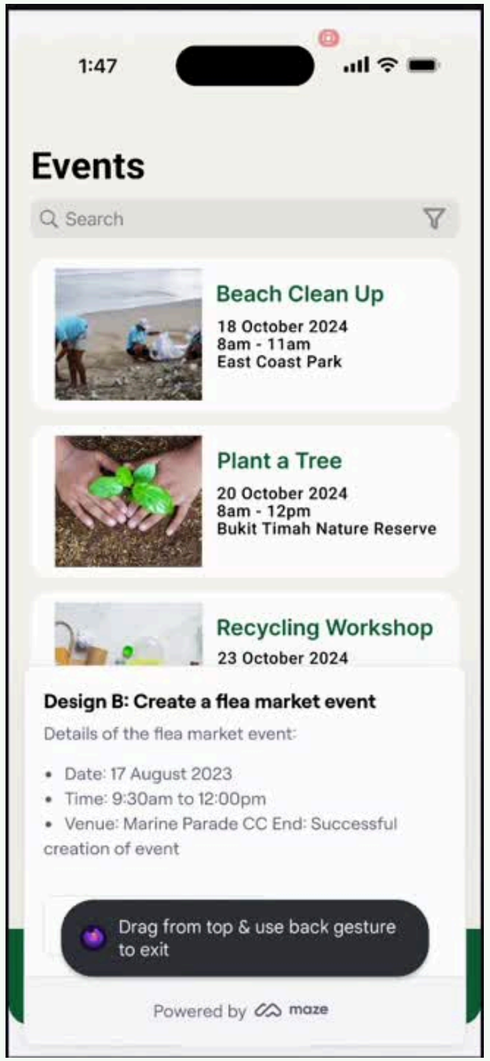

total participants: 30

A/B testing: 15

B/A testing: 15

LIVE EXPERIMENT

INTUITIVENESS RATING

Null Hypothesis (H0):

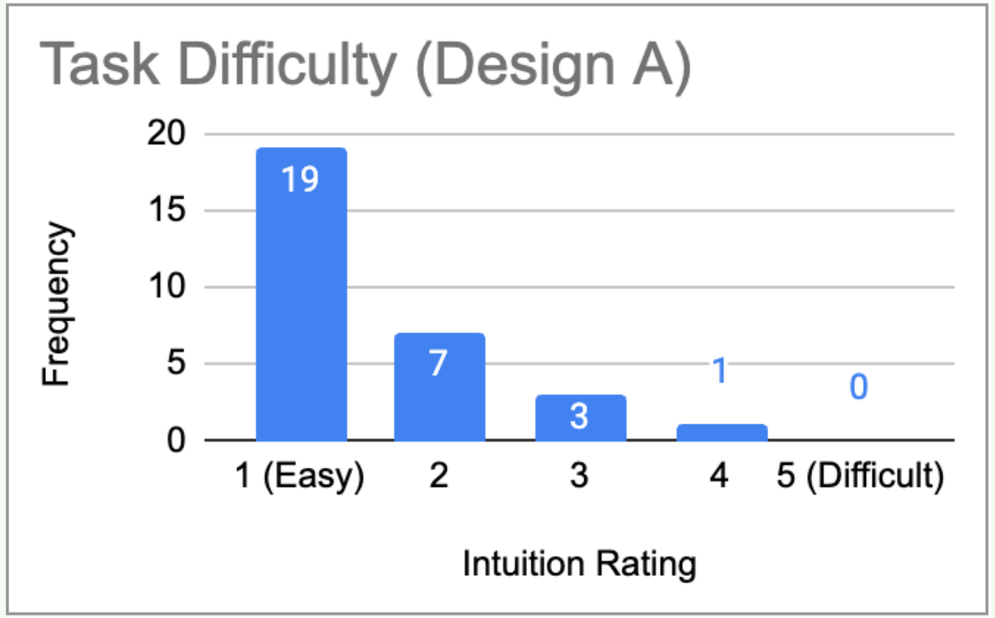

There is no significant difference in intuitiveness rating between Design A and B

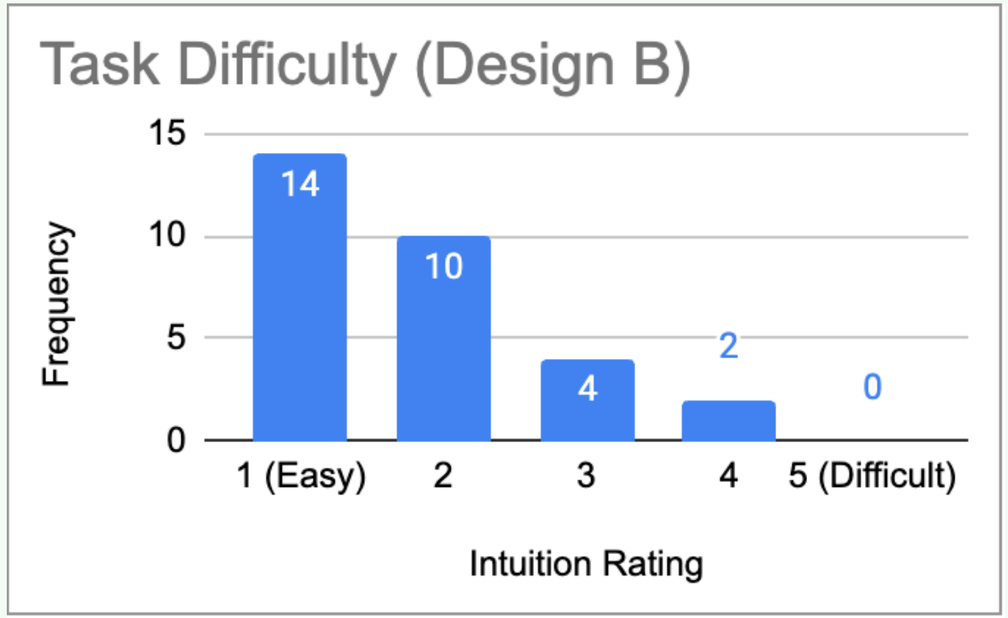

Alternative Hypothesis (H1):

There is significant difference in intuitiveness rating between Design A and B

Data Type	Ordinal Data
Stats Method	Mode, Wilcoxon Testing
P-Value	0.1957
Hypothesis Result	DO NOT REJECT NULL HYPOTHESIS
Conclusion	Design A [draws attention, more noticeable]

INTUITION RATING

USER PREFERENCE

Null Hypothesis (H0):

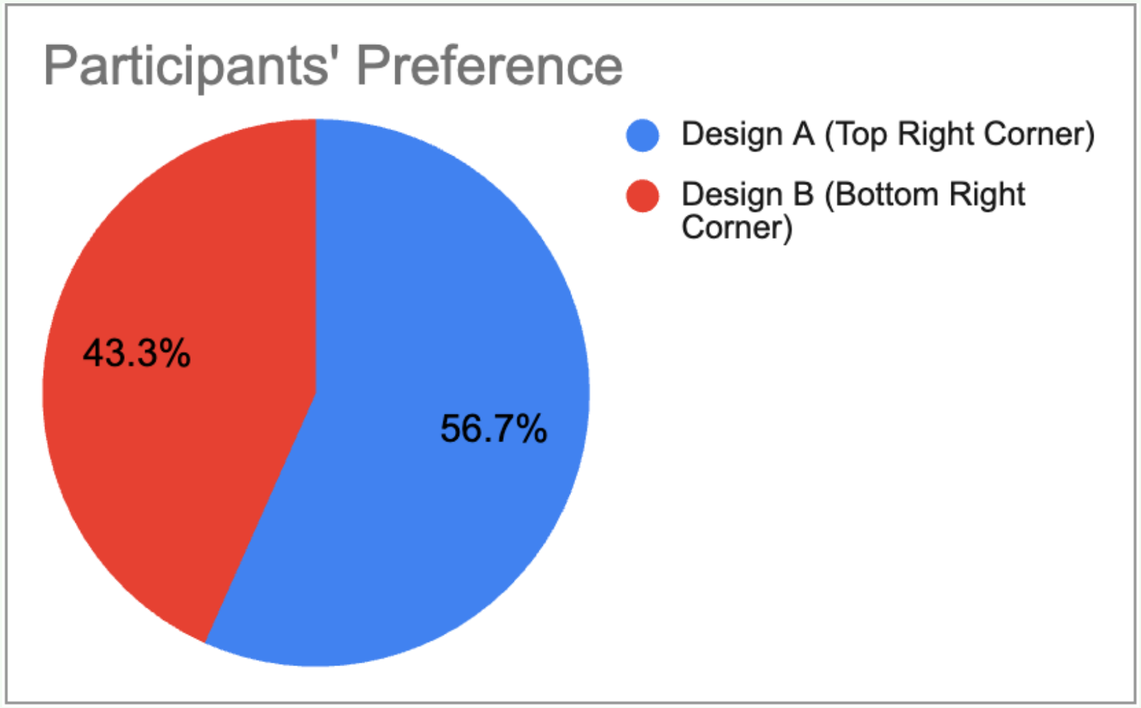

There is no difference in the users' preference between A and B.

Alternative Hypothesis (H1):

There is a difference in the users' preference between A and B.

Data Type	Nominal Data
Stats Method	Mode, Binomial Testing
P-Value	0.5847
Hypothesis Result	DO NOT REJECT NULL HYPOTHESIS
Conclusion	Design A [ease of use, convenience]

USER PREFERENCE

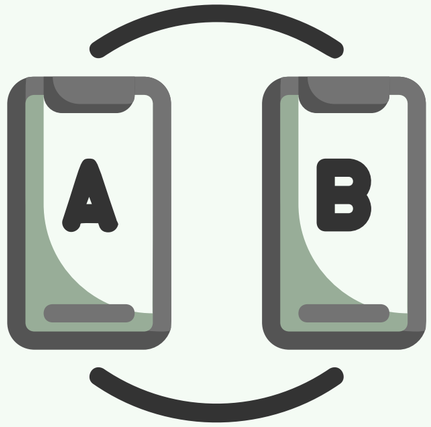

CONCLUSION

Design A WordCloud

Design B WordCloud

5

REFLECTION

REFLECTION

After completing the IDP, I've developed a stronger appreciation for the purposeful design of applications and websites. Every element should serve a clear purpose, as each component–whether it's button placement, information layout, or even color and font choices–can significantly impact the user experience. Colors and fonts, in particular, should follow a cohesive theme to convey a specific atmosphere.

Now, I frequently find myself examining and evaluating the design of websites and applications I use, closely observing user cues, assessing the intuitiveness of the design in guiding next steps, checking for feedback mechanisms, and more.

- Joelyn

The entire journey has been gruelling, from start to end. Ideating for a creative problem, finding a group, starting from scratch. We applied what we learnt every week, constantly fine-tuning our project. Even though I knew exactly how I wanted to design the app at the start, we experienced a lot of feedback that changed me. From empathy insights to the heuristics, changing course wasn't easy, especially when you're fixed from the start and the one constantly staring at it for hours everyday. Still, I'm incredibly glad and grateful for the fresh perspectives others gave. I've learnt to never ever stick too stubbornly to your initial idea, happily take feedback, be free to explore more, experience parallel prototyping, and create an app that genuinely tackles the issue and helps others.

- Jia Ying

Through the this project, I learned that designing an application involves multiple stages and requires significant changes throughout the process. Understanding the intricacies of empathy, prototyping, and evaluation made me realise how essential it is to adapt and iterate based on user feedback. Each phase brought new insights, showing that a successful design is dynamic and ever-evolving. This experience has given me a deeper appreciation for user-centered design and the importance of being flexible and responsive to users' needs.

- Jenis

REFLECTION

IDP has taught me that the world is designed with intent. There is intentional effort put into the design of tools and places and experiences. There are established techniques to express that intent, be it to make something more convenient or to hold someone's attention. Successful examples of design are the ones where its intent and effect has been evaluated and refined over countless iterations until it works just right. Good design has a clear intent towards a specific target audience executed intelligently. It does not leave any part of the process to wishful thinking.
- Zac

IDP has taught me the complexities that go behind UI design. Even seemingly simple design choices like font and colour and heavily affect how a user views an app. This is why there is a need for constant prototyping, trial and error with user testing to figure out whether what we have is what users need. One important concept I will never forget is the "Nielsen's 10 heuristics".
I also appreciated the opportunity to put all the concepts we learnt into practice through the project.
~ Alister

IDP has indeed changed my perspective when viewing websites and applications. I have learnt that there is so much more behind each and every design. Through brainstorming, parallel prototyping, drawing, evaluating & experimenting, each phase of this project has pushed me to become more creative, giving me deeper insight as to how intricate the design process is. It also gave us a hands on experience to truly understand the applicability of the content we learned in class. Overall, idp has made me more aware and appreciative of the designs of website and applications in my life.
- Min Wen

THANK YOU
